- Narrow (1<sup>5</sup>/<sub>16</sub>" ) door rail for maximum viewing area
- Anthony's complete Four-Post shelving system with adjustable 24" deep white epoxy-coated steel shelves and matching price tag molding
- Insulated 2-pane (cooler) or 3-pane (freezer) fully-tempered safety glass
- Torquemaster™ system for door sag adjustment and closing tension
- Magnetic door gaskets for air-tight seal
- Heated door and frame rails to prevent condensation
- Full-length vertical fluorescent 800ma (cooler) or 1500ma (freezer) light fixtures, including lamps, shields, and 120-Volt ballasts
- Available in variety of standard finishes such as smooth or serrated Silver, Black and Gold

Custom Colors Available

Optional T-8 and Precision Lighting Available

Optional Full-Length Handles Available

### Trimline Handles

### Custom Handle Inserts

### Numerous Door Rail Styles

### Hinge Pin

Allows the door to be energized without the use of conventional power cords.

### Torquemaster™

For complete door adjustment – in seconds! Anthony's Torquemaster quickly adjusts door closing tension and centers the door in its frame – with only a regular screwdriver! Providing the benefits of efficient closing action, lasting torque control, and precision door mounting, it works so easily that store maintenance personnel can easily make adjustments, when necessary – without special tools!
