Easy Walk-In Cooler Access

# Pass-Thru Cooler Doors

## Easy Walk-In Cooler Access

Designed to match your reach-in door lineups, these sturdy and attractive pass-thru doors provide easy access to your walk-in cooler.

Anthony's self-closing Pass-Thru cooler doors are available in three styles:

- Solid Panel - Urethane insulated, aluminum-clad or Formica panels: Silver, Gold, Black or White.
- 1/3 Glass and 2/3 Solid Panel
- All glass - 2-pane non-heated Argon-filled glass with heat-reflective coating, or 3-pane non-heated glass Argon fill or heat-reflective coating

Anthony's Pass-Thru cooler doors are manufactured to match Model 101, 1001, 401 & 2100 (Model 103, 1003, 403 & 2103) reach-in door lineups:

Turn your cooler space into a showplace with Anthony's all-glass Pass-Thru doors and Roll-A-Way units - attractive and practical additions to your cooler lineup!

For increased sales volume in walk-in coolers, additional beer, beverage or deli items can be merchandised behind the all-glass pass-thru door. Anthony's Roll-A-Way Beverage or Deli unit is rolled back and out of the way for access to the cooler. When the door is not in use, the Roll-A-Way is pulled back up behind the glass door, with wheels locked, increasing your merchandising display area!

Bumper Bar
