

New Anthony LifePlus Gasket™ Provides Superior Seal, Longer Life, Energy Savings

Retains Flexibility Throughout Repeated Thermal Changes

Sylmar, CA, USA – Sept. 15, 2015 – Anthony®, a Dover Company, has announced the release of LifePlus Gasket™ for cooler and freezer doors that doubles gasket life and provides improved sealing performance over a wide temperature range compared to standard PVC gaskets.

Made of long-lasting thermoplastic elastomers (TPE), LifePlus Gasket retains tight sealing performance throughout repeated thermal changes including anti-condensate heat cycles, and door openings and closings for greater energy efficiency, lower operating costs and decreased maintenance. Tests show LifePlus Gasket lasts over 100 percent longer than standard PVC gaskets.

“LifePlus Gasket is a major innovation in gasket technology,” said Anthony President Craig Little. “The TPE LifePlus Gasket is vastly superior compared to traditional PVC for flexibility, sealing ability and endurance, especially in heavy-use environments such as cooler and freezer doors. In addition to its long life and cost savings, LifePlus Gasket enhances the customer shopping experience by eliminating air leakage and keeping the cold air within coolers and freezers.”

Available as an option on new Anthony 401, 101, Infinity 090 and Eliminaator Renu doors and as a retrofit for all Anthony doors with Aircell door gaskets, LifePlus Gasket meets NSF and FDA requirements and is certified by UL and RoHS. LifePlus Gasket comes with a one-year warranty.

Anthony is a manufacturer and solutions provider of glass doors, lighting systems and display equipment for use in commercial refrigeration systems. For more information on Anthony, please visit www.anthonyintl.com.
