

Anthony® Introduces Infinity 060 Cooler Door *Slimmest Infinity door brings greater merchandise visibility*

Sylmar, CA, USA – June 29, 2016 – Anthony® is pleased to introduce its new Infinity 060 cooler door for walk-in or reach-in cases. With an extremely slim 0.60" painted border, the Infinity 060 provides an all-glass look that delivers excellent energy efficiency to give owners a low annual operating cost while optimizing product visibility.

Available in satin silver, gray or black finishes, the Infinity 060 increases merchandise visibility and complements the look of modern store design. With plastic or aluminum frame options, the Infinity 060 also fits a variety of budget and energy needs. The aluminum frame option is perfect for cooler reach-in and walk-in applications thanks to a front-loading raceway and U-shaped mullion for easy service. The plastic frame option is ideally suited for cooler reach-in cases and features a French door swing.

"There are more food-and-beverage options than ever, but if a consumer can't see the product, they can't buy it," said Sean McGrann, VP of Sales & Marketing for Anthony. "That's why we made the Infinity 060 door's border so thin. It's easier for consumers to see and purchase products."

The Infinity 060 cooler doors installed at the new 365 by Wholefoods Market™ in Silver Lake, CA.

To learn more about the Infinity 060, contact Anthony at sales@anthonyintl.com or (800) 772-0900.

¹Nominal size is 0.60", actual size is 0.62"
