Anthony — the Industry Leader in Glass Refrigeration Cooler & Freezer Doors and Merchandising Systems.

DOORS

NORMAL TEMP | LOW TEMP

Fundamentally redesigned and re-engineered. Anthony® Doors are now standard with advanced anti-condensate sweat protection to keep your cold vault cold, save money and sell more merchandise. The next step in enhancing the shopper experience is selecting the right door.

In need of a rugged and robust solution, both our 401 and 101 series are proven the most durable, reliable, and versatile doors in the industry. Looking to optimize merchandising, our Vista® C Series and Infinity® 60 Series will captivate your shoppers! Our true gem is our Infinity® 90 Series which delivers the best of both worlds— a rugged and robust design with our Infinity Edge design for optimized merchandising. Our innovative New Air Shield Technology is now standard on our 401, 101, and Infinity 90 series, this new feature adds a secondary seal for enhanced thermal protection.

Choose from various colors, finishes and swings to match your store aesthetics, pack-out and shopping engagement objectives.

Next Generation Protection

Retailers know the most effective ways to merchandise products contained in their coolers and freezers, they know that sales of these important and high-margin products have to be maximized. Anthony is continuously improving our products and portfolio to help retailers achieve these goals. Our next generation walk-in door and frame platform comes with a number key features that improve its thermal efficiency and raise its Anti-Condensate Sweat Protection ~ helping our customers save more money and sell more product.

Feature #1:

Next Generation Frame

Our re-engineered and re-designed frame includes new improvements such as vacuum insulated paneling, fully sealed enhanced mullion design, and the overall reduction in the number replacement parts. This new frame improves thermal efficiency, and adds additional Anti-condensation sweat protection.

Feature #2:

Air Shield Technology

Our new Air Shield Technology provides our 401, 101, and Infinity 90 Series an added layer of thermal protection and improved sealing for overall Anti-condensate sweat protection, by blocking air and heat transfer at the door rail. Air Shield Technology along with our new next generation frame, and LifePlus Gasket® sets a new standard of performance.

Feature #3:

Optimax 7 Series LED

The new Optimax 7 LED Series Lighting optimizes cold-vault merchandising through achieving best-in-class uniformity, high color rendering, and improved efficacy that creates improved product visibility for merchandise in convenience-store and grocery-store retailers. The Optimax 7 Series LED provides superior lighting, with remarkable aspects and values, such as Lumen output, CRI, and LUX incident on target area are key to achieving the best light to optimize your merchandise.

Feature #4:

LifePlus Gasket®

Our LifePlus Gasket® provides superior sealing performance and longer life compared to standard PVC gaskets to better lock in refrigerated air and save energy costs. Made from long-lasting polymers, the LifePlus Gasket® retains tight sealing performance throughout repeated thermal changes including anti-condensate heat cycles, and repeated door openings and closings. Our LifePlus Gasket® comes standard with a three year parts and one year labor warranty thereby lowering operating costs and decreasing the need for maintenance. LifePlus Gasket® is the New Standard in commercial refrigeration gaskets.

PASS-THRU Doors

Anthony Pass-Thru doors are 2017 D.O.E. compliant and designed to match your door lineups. They are sturdy, attractive, and provide easy access to your walk-in coolers. For increased sales volume in walk-in coolers, additional beer, beverage or deli items can be merchandised behind the Pass-Thru door. Anthony's Roll-A-Way Beverage cart is rolled back and out of the way for access to the cooler. When the door is not in use, the Roll-A-Way is pulled back up behind the glass door, with wheels locked, increasing your merchandising display area.

optimax 7 LED Series

Vertical
Lighting

Take optimizing your merchandise to a New Level, with our new Optimax 7 Series LED Refrigerated Case Lighting. The Optimax 7 Series is specifically designed to optimize your merchandise and increase cold-vault sales, this new series features best-in-class uniformity and high color rendering for enhanced product visibility, color saturation, and clarity.

Many manufacturers focus only on Lumen output, here at Anthony we know that to achieve superior lighting optimizing all aspects and values, such as Lumen output, CRI, and LUX incident on target area are key to achieving the best light to optimize your merchandise.

APPLICATIONS

- Designed for normal and low temperature refrigeration walk-ins and display case applications.
- Ideal for C-Stores, Grocery, and Big Box Retailers.

MODEL OPTIONS

- **Optimax™ 7 Series - Low Power**

Our entry level and most economical offering for our 401 Door Series available in limited sizes in an 4000°K Color Temperature.

- **Optimax™ 7 Series - Standard Power**

Our Standard Power option is designed specifically for Single Swing door applications for walk-in and reach-In case applications.

- **Optimax™ 7 Series - French Swing**

Our French Swing option is designed specifically for French opening applications for walk-in and reach-In case applications.

TRUE COLOR RENDERING

Our New Optimax 7 Series LED is second to none when it comes to achieving best-in-class uniformity and high color rendering that creates improved product visibility. Our new Optimax 7 Series LED achieves a CRI of 94 making your merchandise “POP” with clear, vivid, vibrant, and as close to natural light (CRI 100) as possible. As you can see above her at Anthony have made tremendous improvements in LED lighting over the years and are proud and excited for the newest LED the Optimax 7 Series.

UNIFORMITY, & COLOR RENDERING

Anthony's Optimax 7 Series LED lights now offer longer fixtures for our taller door sizes (Size 75 or Taller) to ensure maximum coverage both from side to side and top to bottom, (see images above) eliminating light drop-off and reducing hot-spots. Our newest Optimax 7 Series LEDs have been designed with an optimal brightness that is consistent and uniform to maximize your ability to optimally merchandise your products.

Maximize Door Life, Minimize Costs

LifePlus Gasket® provides superior sealing performance and longer life compared to standard PVC gaskets to better lock in refrigerated air and save on energy costs. Made of long-lasting polymer, LifePlus Gasket® retains tight sealing performance throughout repeated thermal changes, including anti-condensate heat cycles, and door openings and closings. LifePlus Gasket offers greater energy efficiency and lowers operating costs by extending gasket life and decreasing the need for maintenance.

- 1-year labor, and 3-year parts replacement warranty
- Increases door gasket life by over 100%
- Last up to 5x longer than conventional PVC gaskets on the market
- Excellent door sealing performance at low temperatures
- Enhanced customer shopping experience by eliminating air leakage
- Reduced maintenance costs

Applications:

- Cooler and Freezer
- Retrofits onto All Anthony Doors with Aircell PVC Door Gasket

Standard Features:

- Magnetic Door Gasket for Tight Seal
- 1-Year Labor, 3-Year Parts Warranty
- UL & cUL Compliant

Standard on Anthony Models:

- 101
- Infinity 90

5X Longer Lasting

Number of cycles LifePlus Gasket can experience without wear and tear. 5x the life of traditional gaskets.

Material Construction

Material properties have a higher resistance to fatigue, providing longer gasket life, energy savings and reduced air leakage.

Thermal Stability

Competitor PVC LifePlus Gasket

Maintains a tight door seal regardless of door thermal cycling, saving energy by reduced air leakage.

Bellow Thickness

Competitor PVC LifePlus Gasket

Absorbs door slam shock, lengthening life of doors and door hardware.

Warranty

Competitor PVC LifePlus Gasket

LifePlus Gasket is covered against defects for 3 years vs. competitor's 30 days.

Standard Flat Shelving

Anthony's Flat Shelving is standard with all Anthony door models. The shelving is strong, sturdy, and easily installed without any special tools.

MINI-ROLLER SYSTEM

Boost shelving capacity, product sales and restocking efficiency by adding Mini-Roller Systems onto new or existing wire shelves. The Mini-Roller Systems complete the line up for engaging product visibility, perfect well lit presentation and improved food safety ensured by Anthony glass doors. Anthony is the single source for all of your Mini-Roller System, shelving, lighting and merchandising needs.

Driven by gravity, the Mini-Roller System is a one-piece, roller shelf surface that enables multiple-sized facings on the same shelf to slide smoothly and independently to the front of the shelf as items are removed. Ideal for single-serve beverages, the Mini-Roller System also provides labor cost savings by facilitating quick product resets and stocking. Easy to assemble and install in new and existing coolers with extreme flexibility for fast configuration changes.

Standard Features

- Dividers and clear acrylic front stop easily snap in for different product facings with multiple configurations to fit your needs
- Speeds restocking for labor savings
- No tools required for easy installation
- Easy reconfiguration for merchandising resets
