

Outside Mount Doors

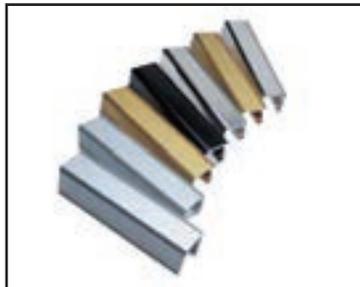

Model 6001/601B Series Doors

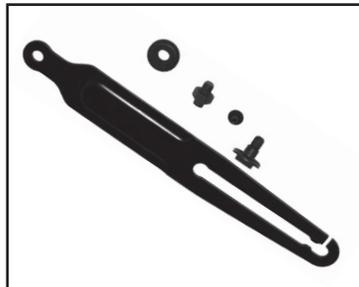

Outside Mount Doors

Mounted on Front
Surface of the Case

Anthony's glass display outside mount doors are the most energy-efficient doors in the industry for merchandising medium- and low-temperature products. Available with patented heat-reflective glass coatings, the outside mount doors provide energy efficiency and maximum product visibility. These doors can be manufactured to fit your newly-engineered or existing refrigerated display areas, and are suitable for a variety of applications.

Model 6001 and 601B Outside Mount Doors

Anthony's aluminum outside mount doors are designed for both cooler and freezer applications. The aluminum-framed doors come in a variety of finishes and handles to coordinate with store lineups. Offering a choice of top and bottom hinge hardware, these doors are mounted with brackets on the front surface of the case (no perimeter frame).
