

Clean Grip Handle

Harmful bacteria can be found on the surface of the products used throughout the Grocery and C-Stores. Anthony's Clean Grip Door Handle contains an antimicrobial agent* that is incorporated into the material during the manufacturing process and will not wash off or wear away. With this added protection against the growth of bacteria, your customers can shop with peace of mind.

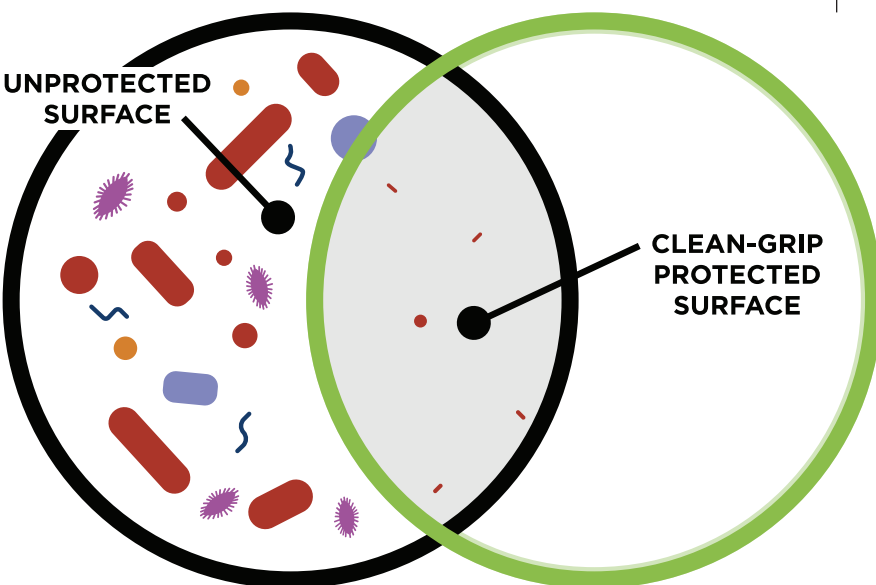

The Clean Grip's antimicrobial agent* helps to inhibit the growth of bacteria and fungus on the handle surface.
